## Genetic Testing Report

Arlo

### Color Results(5 of 16)

|         |              |                                                                                                  |
|---------|--------------|--------------------------------------------------------------------------------------------------|
| A-Locus | <b>at/at</b> | Dog has two copies of the gene causing tan points.                                               |
| B-Locus | <b>B/B</b>   | Dog does not carry the mutation for most forms of chocolate coloration.                          |
| D-Locus | <b>D/D</b>   | Negative: Dog is negative for the mutation associated with a diluted coat color.                 |
| E-Locus | <b>e/e</b>   | Dog has two copies of cream/yellow.                                                              |
| K-Locus | <b>n/n</b>   | Dog is negative for the KB allele, and the coat coloration will be based on the agouti genotype. |

### Pattern Results(1 of 16)

|         |            |                                                                                                            |
|---------|------------|------------------------------------------------------------------------------------------------------------|
| S-Locus | <b>S/S</b> | Homozygous: Dog has two copies of S-Locus resulting in a nearly solid white, parti, or piebald coat color. |
|---------|------------|------------------------------------------------------------------------------------------------------------|

### Trait Results(4 of 16)

|                   |                                    |                                                                                                                                                                                                        |
|-------------------|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Curl 1&2          | <b>C<sup>1</sup>/C<sup>1</sup></b> | The dog has two copies of the hair curl allele. The dog will have curly hair, and will always pass on a copy of the hair curl allele to any offspring. All offspring of this dog will have curly hair. |
| Furnishings       | <b>F/F</b>                         | Furnished: Dog has two copies of the furnishings mutation and will always produce offspring with a furnished coat.                                                                                     |
| Hair Length (1-5) | <b>l<sup>1</sup>/l<sup>1</sup></b> | Two copies of the long-hair allele, dog will have longer than average hair per the breed standard.                                                                                                     |
| Shedding          | <b>n/n</b>                         | Dog has no copies of the shedding allele. The dog will have a low propensity towards shedding.                                                                                                         |
